Spiel

As said last time we are going to present our hobby to about 100.000 people from 2nd to 4th October 2015 at the new Leipzig fairgrounds hosting the 20th Modell Spiel Hobby fair. It was our 14th appearance and I'm happy to share some pics!

When we arrive the hall 3 row D the Matchbox banner 2,5*4m is already hanging of the ceiling. This is the bigger stand if two being 21*5 metres. Setup in orange and than with blue steps to resent.

On the way to Leipzig we had a nice „take over“ ;)

This is the smaller of the two stands we have – only 11*5 metres ...

Of course orange layout and Matchbox all along the walls.

Some impressions of the equipped stalls & other parts of the whole fair!

Some more impressions ... need more – just ask Google for Modell Spiel Hobby 2015

Weekend after Leipzig I went on a bike trip to Munich visiting the BMW Museum – I share some pics as well ... explore the world!

I know you want to see this ... top left BMW CSL up to 750 hp – and top right the DRM race car. Bottom left the real M1 and on the right a prototype for the 502 – never saw one before ! Middel right is the famous 1972 BMW Turbo prototype for the M1.

The salat bowl building on the first pic houses the Mini special show – here are some highlights – old and new incl. superleggera prototype !

I hope to get some pics from you as well with my ambassador cars – either the Fisker or the VW T1 exploring the world! Best pic end of my ambassadorship gets a unique model from me! And you can do better than my demo with the older bimmer on the carpark !
